Předmět: Natura 2000 Networking Programme

Dear ,

My name is \_\_\_\_\_ and I am working on the Natura 2000 Networking Programme. This programme is managed on behalf of the European Commission by the partnership of Eurosites, the EUROPARC Federation and the European Landowners Organisation (ELO). The Programme involves a programme of training, thematic workshops and a communication strategy targeted at key individuals involved in or influential to the management of Natura 2000 and also the general public. For further information, please visit the programme website at: [www.natura.org](http://www.natura.org) or the programme blog at: <http://natura2000networkingprogramme.blogspot.com/>.

I am writing to invite you to contribute to a central element of the Natura 2000 Networking Programme. This is the case studies. As part of the Natura 2000 Networking Programme, case studies of good practice management and partnerships will be displayed and communicated. The case studies are key to the communication of good practice within Natura 2000. They will be developed and later placed on the programme website in order to communicate them to a larger audience.

As Czech Republic is not yet represented in this programme, we would encourage your organisation to participate and thus communicate your valuable and important work on Natura 2000 to a wider, European audience.

We invite you (or a colleague from your network) to fill out the attached case study template and return it to me as soon as possible (each case study will represent one particular Natura 2000 site.)

Please do not hesitate to contact me if you require any further information or assistance.

On behalf of the programme partners, we thank you in advance for your contribution to this programme.

Kind regards

EUROSITES
